SUMMARY

Associate Full-Stack Developer with hands-on experience in designing and developing scalable web applications. Skilled in both front-end and back-end development, with a primary focus on backend technologies using PHP and the Laravel framework. Confident in building RESTful APIs, integrating databases, and optimizing application performance. Passionate about clean code, user-centric design, and continuously learning new technologies to deliver innovative and reliable digital solutions.

WORK EXPERIENCE

Associate Full Stack Developer

Code Surge (Pvt) Ltd | Feb 2025 – Present

- Developed and maintained dynamic web applications.
- Designed and improved classified platforms and internal management systems.
- Built custom backend functions and database structures for business needs.
